return to activity**

SOLVE THE COMPLIANCE CHALLENGE

A man with grey hair, wearing a white t-shirt and dark blue pants, is sitting on a chair in a clinical or hospital setting. He is wearing a black Matrix Shoulder L3960 brace. The brace consists of a wide black strap across his chest, a black collar around his neck, and a black strap around his waist. He is holding a black handle attached to the brace. The background shows a white wall with a framed anatomical chart and a wooden cabinet.

Medical-grade support your
patients will actually wear.
